Projects

NetFix Ruby on Rails, React.js, Redux.js, PostgreSQL

Live | GitHub

A RESTful single-page app that applies a JSON API, inspired by Netflix.com
· Linked MVC backend with React to enable users to like, review & add videos to personal list
· Utilized AJAX calls to retrieve videos/reviews/likes and provide a categorized index of videos
· Implemented search bar using ActiveRecord queries, protected against SQL injection
· Offloaded image/video storage to AWS and integrated with the Paperclip library

BrickOut JavaScript, Canvas

Live | GitHub

A browser game inspired by Brick Breaker
· Applied collision detection by applying geometric calculations w/ JavaScript functions and
  harnessed it by adding power-ups that alter mid-game difficulty
· Implemented event listeners for game controls, recursively calling RequestAnimationFrame
  to update screen before next repaint

jControl Document Object Model API, JavaScript

GitHub

A JavaScript library for streamlined DOM manipulation, event handling, and AJAX
· Leveraged DOM API for handling dynamic HTML, and XMLHttpRequests for server requests

Skills

Ruby	Rails	Redux.js	Next.js	HTML	CSS	Heroku	PHP	SASS	Jasmine
JavaScript	React.js	jQuery	AJAX	SQL	Git	AWS	Webpack	REST	RSpec
